

# Flood Problems in Heber

Intro No finger pointing - We are all at fault

Geology:

1. Runoff every yr → Verdant Valley
2. Formerly - Pioneer times - many creeks carried off the runoff.
3. Now many are filled in & homes built over.
4. One main canal left for runoff = Lake Creek
- 5.

History: Most every yr - we have runoff.

in 22 yrs since I have worked in my present office it has progressively become worse.

This by far the worst.

Present Problems: (stem from 2 sources)

1. Fast & sudden runoff.
2. Canals are filled w/ rock, sand, sticks, cans, chairs
3. No dams or other deterrents to sudden floods
4. No catch basins to catch debri  
ie Center ville, Bountiful, Farmington - all along <sup>west</sup> Wasatch Front. We are no different - except in financial wealth.
5. State Road Bottleneck 36" pipe

lack of foresight  
Non-Planning  
City & County  
lack coop. effort

## Suggested Solutions:

1. Good Engineer consultation
2. Consider value of dam to keep water for irriga.
3. Build cement-lined catch basins - (Co & City)
4. Keep canals cleaned out (irriga Cos)  
Law against debri thrown in canals - stiff penalty
5. More Debri Screens down stream. (Co. & City)
6. Keep one area behind Wasatch office cleared out (City)
7. Inform Public of Law

## Next Steps:

1. Grand Council

1986  
Flood

## Summer
